**Final Office Action on the Merits**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Withdrawal of Finality of Last Office Action***

2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

***Status of the Application***

3. Claims 1-29 are pending in the present application. Claims 5, 6, 9-21 and 24-29 stand withdrawn from further consideration as being drawn to a nonelected invention. Claims 1-4, 7, 8, 22 and 23 will be examined according to MPEP § 803.02.

***Claim Rejections - 35 USC § 102***

4. **The rejection of claims 1-4, 22 and 23 under 35 USC 102(b) over Madaio et al. is withdrawn.**

***Claim Rejections - 35 USC § 103***

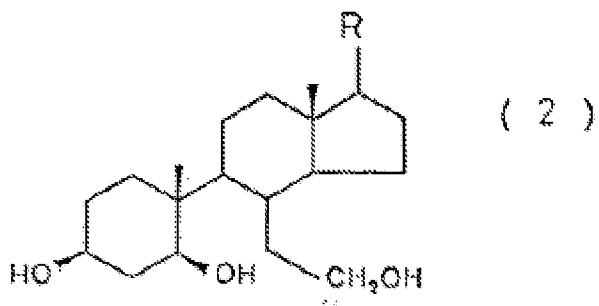

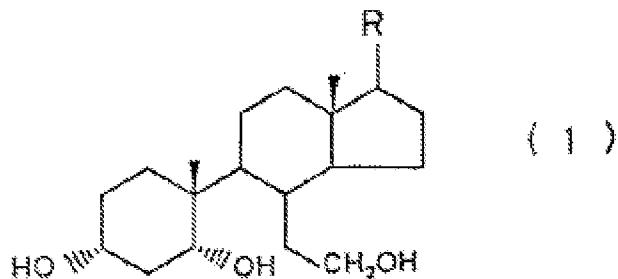

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

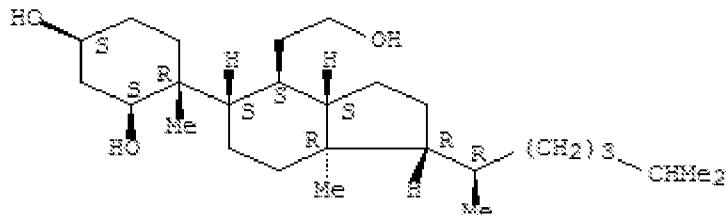

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-4, 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Niwa (JP 05221901 A, 1993).

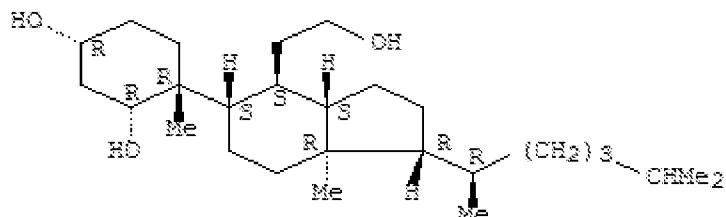

Niwa teaches 5,6-secosterols of following formulae:

useful as hypolipemic agents (see the attached English translation, especially section 0001). The reference teaches R is a hydrocarbon group inclusive of alkyl and alkenyl groups (see section 007). Niwa exemplifies compounds such as

and

The instant claims differ from the reference by reciting compounds not exemplified by the reference, i.e., the prior art compounds wherein R is alkenyl. However, as stated above Niwa teaches R can be an alkenyl group. Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to make the prior art compounds wherein R is an alkenyl group with the reasonable expectation that the compounds obtained would have similar properties and use as the prior art genus as a whole. The motivation would be based on the desire to obtain additional hypolipemic agents as taught by Niwa.

#### ***Claim Objections***

7. Claims 7 and 8 are objected to as being dependent upon a rejected base claim. The instant claims are allowable to the extent they read on the elected species.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
